Singer Track1 Only Watch Edition

Singer Track1 Only Watch Edition for Duchenne strain of muscular dystrophy research 2019

LINKÖPING June 2019 – GoS Watches first ever brand collaboration is with Singer Reimagined to participate in the 8th edition of the biannual Only Watch auction. Singer Reimagined donates a one-of-a-kind watch created explicitly for this charitable event: the first and only Black Damascus Steel version of Singer Track1 chronograph.

The Auction will be organized by Christie's within the scope of Only Watch gala 2019 scheduled to take place at The Four Seasons Hôtel des Bergues in Geneva on November 9th, 2019. Only Watch is a world-renowned charitable fundraiser which has been held

every two years since 2005 to raise money into research on Duchenne Muscular Dystrophy. Participating watch brands in previous years, all of which donated a unique watch, to name few : Blancpain, Breguet, Chanel, Chopard, De Bethune, De Grisgono, FP Journe, Girard Perregaux, H. Moser & Cie, Harry Winston, Hermès, Hublot, IWC, Jacob & Co, Piaget, Rebellion, Richard Mille, Tudor, Ulysse Nardin, Vacheron Constantin, Van Cleef & Arpels and Zenith.

This year, Singer Reimagined donates its unique Black Damascus Steel piece, created exclusively for Only Watch. This one-of-a-kind Edition was developed in collaboration with **Johan Gustafsson** and **Patrik Sjögren** of GoS Watches.

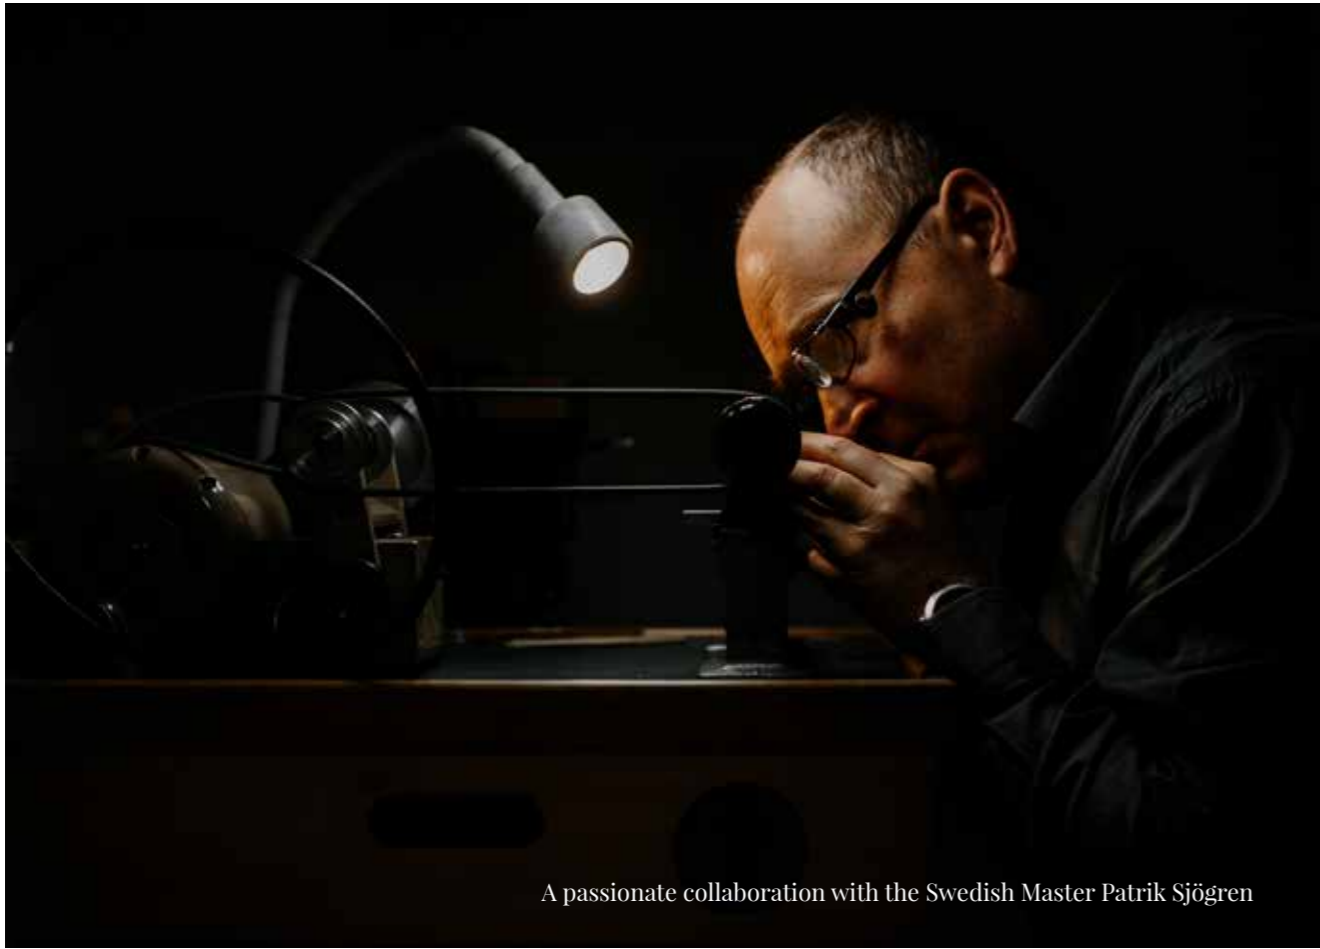

Damascus steel is created by layering different types of steel and then applying different techniques to create a pattern that runs through the whole piece.

GoS sourced the material from Damasteel, Swedish masters of stainless Damascus steel. The steel was forged according to GoS intentions to create the perfect pattern to highlight the shapes of the Singer Track1 case. GoS then further refined the material before milling the case.

*The first and only black damascus steel
version of Track1 chronograph*

Master bladesmith Johan Gustafsson handforges Damascus steel

A passionate collaboration with the Swedish Master Patrik Sjögren

GoS has a combined 35 years of experience in Damascus steel finishing. The elaborate finishing GoS selected for Singer Track1-Only Watch Edition combines deep- etched surfaces with lightly etched ones to reveal the Damascus steel pattern in different ways.

The case is all black to enhance contrasts towards the exclusive golden details on the dial. The special true black coating was developed and applied by Ionbond Sweden. It is the darkest black PVD available and the result of 10 years research.

Agengraphe movement

Singer Reimagined has a unique movement has been developed during a decade thanks to Agenhor creative and engineering talents. The chronograph’s hours, minutes and seconds are coaxially mounted in the center of the dial, taking central stage. Uncommonly, day -time is displayed on dial periphery and indicated digitally at 6 o’clock via the luminescent pointer set above 2 ceramic disks rotating clockwise, featuring luminescent hours and minutes marks.

Before it is auctioned off, the Singer Track1-Only Watch Edition will be en-route for a world tour. The first stop will be hosted by the Principality of Monaco during the prestigious Monaco Yacht Show, from 25 to 28 September.

The collection will then be showcased at first class events, Christie’s salerooms as well as leading retailers, in Dubai, Paris, London, New York, Tokyo, Singapore, Hong Kong and Taipei.

The auction will take place on Saturday 9 November 2019 at the Four Seasons Hôtel des Bergues, in Geneva, under the hammer of Christie’s.

The elaborate hand-finishing of the case reveals the Damascus steel pattern in different ways.

TECHNICAL DATA

Singer Track1-Only Watch Edition

Reference: SR-OW
Production: Unique Piece

Movement

Calibre	Singer automatic column wheel chronograph – Cal. AgenGraphe 6361
Dimensions	34.40 mm
Height	7.18 mm
Number of parts	477 components
Number of jewels	67 rubies
Power reserve	55 hours
Escapement	Swiss lever
Balance	Flat with AgenPit regulator
Frequency	21'600 vph (3 Hz)

Fonctions

Hours & minutes on peripheral discs, central chronograph with instantaneous hours (60h), instantaneous minutes (60m) and sweeping chronograph seconds (60s)

Watch features

Case material	Black Damascus Steel - Damasteel - machined and finished by GoS with true black PVD coating
Case dimensions	Diameter: 43mm - Height: 15mm
Water resistance	10 ATM / 100m
Glass type	Domed Anti-reflective sapphire crystal
Back-case	Screw-down with anti-reflective sapphire crystal
Pushers function	Start & stop push-button at 2 o'clock, reset push-button at 10 o'clock, winding crown at 4 o'clock
Dial	Black central dial with golden tachymetric flange - Signature orange chronograph's hands with central golden cabochon Peripheral ceramic disks with luminescent indications - Luminescent orange indicator at 6 o'clock
Strap	22/18mm black textile with golden stitching and golden titanium screw-down rivets. Stainless steel folding buckle or titanium pin buckle (upon request)
